

# Models

## User

Holds everything that is related to the user i.e. the authentication and the user-profile.

## Broker

Broker represents a DAI-Broker, which is used to gather search-results.

## Query

A Query is an abstraction to the broker, for one queryterm it will gather the results from multiple Brokers and combine those.

# FLUX

## Actions

login/logout  
addQuery  
removeQuery  
favouriteItem  
voteItem  
addItem  
layout  
addDomElement  
buyBooster  
addFlashMessage
